wate		nafter stated. (If applicant is a corporation, give date and place of incorpora-				
tion;		ive names of members.)				
1.	The source of the proposed approp	oriation is underground  Name of stream, lake or other source.				
2.	The amount of water applied for is	1.0 second-feet One second-foot equals 448.83 gals, per min.				
		per of acre-feetacre-feet				
3.	The water to be used for	Quasi-Municipal  Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.				
4.	If use is for:					
	(a) Irrigation (state number of acre	s to be irrigated)				
	(b) Stockwater (state number and k	kinds of animals to be watered)				
	(c) Other use (describe fully under	"No. 12. Remarks")				
	(d) Power:	-				
	(1) Horsepower developed					
	(2) Point of return of water to	stream				
5.	The water is to be diverted from its	s source at the following point: S.E. 4 of S.E. 4 of Unsurveyed Section				
	T.2N., R.60E., M.D.M.; a	and bearing S.35 <sup>0</sup> 11'W. 27,280 feet to S.W. Corner Section				
3	I, T.2N., R.60E., M.D.M.	division of public survey, and by course and distance to a section corner. If on unsurveyed land,				
	it should be stated.	ncludes only federally owned land as described in				
		Describe by legal subdivision, if on unsurvéyed land it should be so stated.				
		·				
7.		l and end about December 31, of each year.  Month and Day				
8.		Under the provisions of NRS 535.010 you may be required to submit plans and				
	specifications of your diversion or	storage works.) Diverted through pipes for construction				
р	C	11				
•	State manner in which water is to be di	verted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.				
	***************************************					

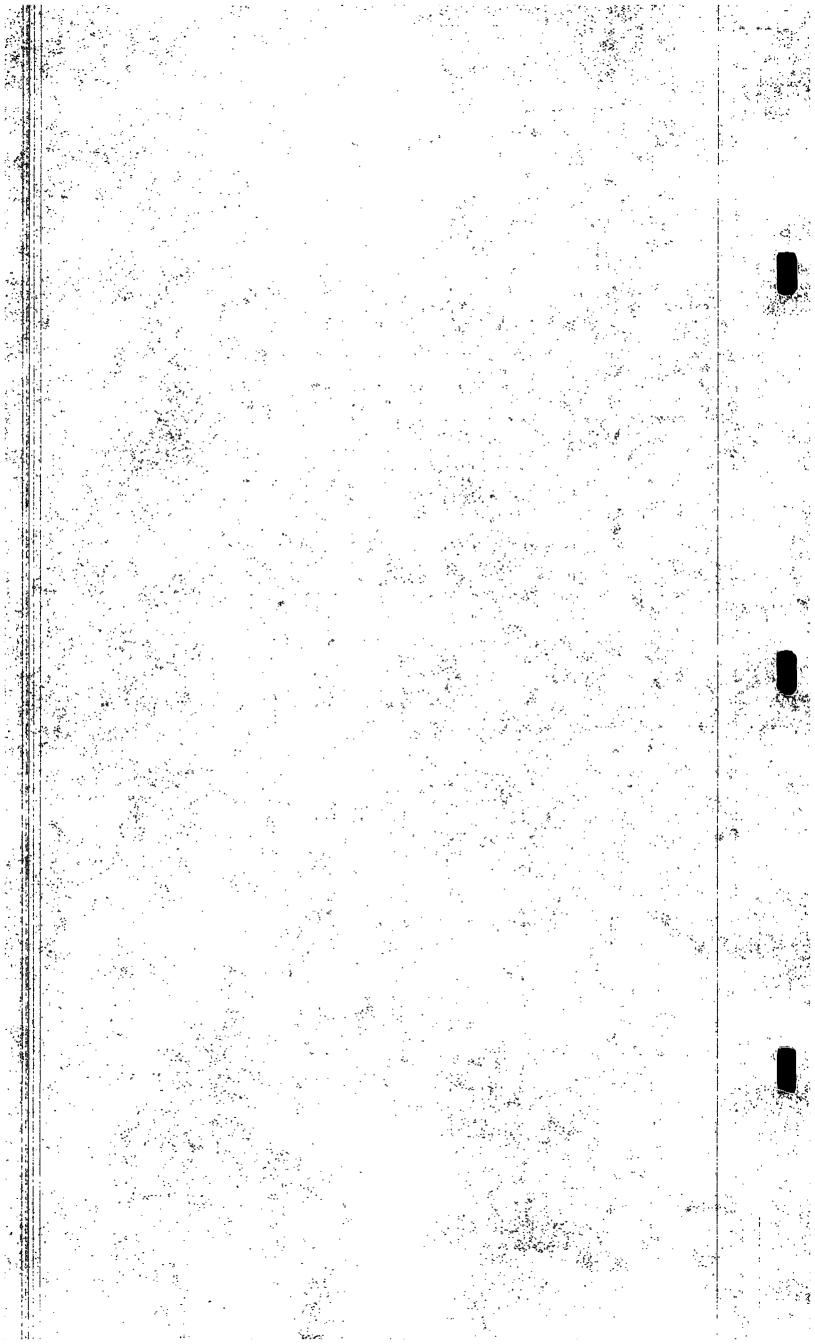

9.	Estimated cost of works approximately \$250,000					
10.	Estimated time required to construct works One (1) year					
11.	Estimated time required to complete the application to beneficial use Two (2) years					
12.	Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annu consumptive use.					
	See Attachment A for explanation of total annual quantity of ground water					
	requested for the basin and its intended use.

🧗 Attachment - A

The attached application for the appropriation of ground water is for the purpose of supplying water for the construction and operational phases of the MX Missile System in Coal Valley. The attached application is one of nine for appropriation of ground water in the valley. Each application is for 384 acrefeet per year of ground water resulting in a total quantity of 3456 acre-feet per year for the ground-water basin. This is a conservative figure and is greater than that which will likely be required annually during the construction period. The 3456 acre-feet are requested for only a one to two year construction period within a span of five years beginning in 1984 and ending in 1989. Construction of roads and a possible construction plant and camp are expected to commence about one, year prior to shelter construction and will require less than one-fifth of the 3456 acre-feet figure. Ground water required for road construction is included in the 3456 acre-feet for shelter construction. Following construction the operational ground-water use is expected to be less than 300 acre-feet per year: This reduced quantity of ground water will be needed for the life span of the system which will be approximately 20 years.

The ground water for construction will be used for road compaction, dust suppression, shelter construction, miscellaneous structures, and possibly construction plants and camps. Ground water for the operational phase will be used for maintenance and surveillance facilities personnel as well as other possible support systems.

The place of use of the ground-water, as indicated on the attached water rights survey map, covers the entire valley in anticipation of the probably broad areal extent of construction activities. It is possible that once the construction planning has been completed, a request may be filed to change the point of diversion on the attached application to a more strategic location, however, the above stated total quantity of ground water will remain the same.
